

YOUR BABY needs you . . .

Did you know that at just 18 days old, your unborn baby's tiny heart begins to beat? Here are some other milestones in your baby's development:

- ♥ **WEEK 5:** Brainwaves can be detected.
- ♥ **WEEK 8:** All your baby's organs are already present.
- ♥ **WEEK 9:** Your baby has fingerprints.
- ♥ **WEEK 10:** Your baby can squint, swallow and wrinkle its forehead.
- ♥ **WEEK 12:** Your baby sleeps and awakens; turns its head; curls its toes; and opens and shuts its mouth.
- ♥ **WEEK 16:** Your baby now can hear your voice and your heartbeat.
- ♥ **WEEK 20:** Your baby now has eyebrows, eyelashes, and fingernails.

Day by day, your baby is growing and developing inside you. As you confront the challenge of this pregnancy, your baby is depending on you for life.
